

## AMENDMENTS TO THE CLAIMS

This Listing of Claims will replace all prior versions and Listings of Claims in the application:

### Listing of Claims

**Claims 1-28** (Canceled)

**Claim 29** (New) A display apparatus comprising:

    a display unit adapted to display an image;

    a time setting unit adapted to set a time, the time to be set by said time setting unit can be changed by a user;

    a detection unit adapted to detect whether the time set by said time setting unit is passed;

and

    an image size changing unit adapted to change an image size of the image to be displayed on said display unit so as to warn the user that the time set by said time setting unit is passed, if said detection unit detects that the time set by said time setting unit is passed.

**Claim 30** (New) The display apparatus according to claim 29, wherein said image size changing unit reduces and enlarges the image size of the image to be displayed on said display unit so as to warn the user that the time set by said time setting unit is passed, if said detection unit detects that the time set by said time setting unit is passed.

**Claim 31** (New) The display apparatus according to claim 29, wherein said display apparatus is capable of being mounted on user's head.

**Claim 32** (New) The display apparatus according to claim 29, wherein said display unit includes a liquid crystal display adapted to display an image, and a backlight source adapted to illuminate said liquid crystal display from behind.

**Claim 33 (New)** A method of controlling a display apparatus, the display apparatus including (a) a display unit adapted to display an image and (b) a time setting unit adapted to set a time, the time to be set by said time setting unit can be changed by a user, the method comprising the steps of:

detecting whether the time set by said time setting unit is passed; and  
changing an image size of the image to be displayed on said display unit so as to warn the user that the time set by said time setting unit is passed, if it is detected that the time set by said time setting unit is passed.

**Claim 34 (New)** The method according to claim 33, further comprising a step of reducing and enlarging the image size of the image to be displayed on said display unit so as to warn the user that the time set by said time setting unit is passed, if it is detected that the time set by said time setting unit is passed.

**Claim 35 (New)** The method according to claim 33, wherein said display apparatus is capable of being mounted on user's head.

**Claim 36 (New)** The method according to claim 33, wherein said display unit includes a liquid crystal display adapted to display an image, and a backlight source adapted to illuminate said liquid crystal display from behind.
